Coronavirus (COVID-19): Disposing of Waste

How to dispose of your waste, including face coverings and personal protective equipment (PPE), during the coronavirus pandemic.

If you need to throw away used face coverings of any kind or other items of Personal Protective Equipment (PPE), such as gloves, you now need to dispose of them in your non-recyclable waste bin. We can provide extra bins for your staff and customers to throw away their waste face coverings and PPE used as protection during this pandemic. Please ensure that staff and customers do not put any of these items in your recycling bin, as at this moment in time they cannot follow the normal recycling routes. We will of course keep you up to date if there are any changes to this government guidance. Furthermore, due to the current situation, textiles, paper towels etc that would have gone down the recycling routes also need to be kept separate from other recyclable products. As a company our process is to stand all skips and containers that have entered our site from customers for a minimum of 72 hours before tipping and segregating the waste, to protect our staff from the virus.

Our newly wrapped response vehicle ready for action!

“Don’t you worry S & J will be there in a hurry. We will go above and beyond, with a service that will respond”

S & J Synergy are proud to announce we have recently taken on a new contract with Saint-Gobain.

Saint-Gobain designs, produces and distributes materials and solutions designed for the well-being of each person and the future of all. These materials are found everywhere in our homes and our daily lives: buildings, transport, infrastructure, as well as in many industrial applications. They provide comfort, performance and security while meeting the challenges of sustainable construction, efficient resource management and climate change. Saint-Gobain has more than 179,000 employees of over 100 nationalities.

We are now servicing 3 of their major groups;

Saint-Gobain Glass - Europe's leading manufacture of flat glass for the construction industry, including float, coated and laminated glass products.

Saint-Gobain British Gypsum - British Gypsum is the UK's leading manufacturer of plasterboard and plaster-based drylining systems and products and one of the most respected brands in UK construction.

Saint-Gobain Celotex - A leading manufacturer of PIR insulation solutions.
