

# S & J SYNERGY RECYCLING TRAINING

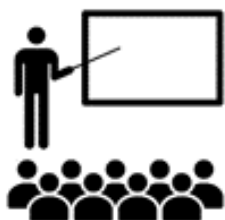

Our in-house recycling heroes are now taking bookings for our new recycling training programme!

You are invited to undertake training sessions on efficient and cost-effective ways to recycle and the importance on why we MUST recycle.

We will host a classroom session and then take the trainees out on-site to demonstrate what is involved in waste recycling. The sessions will comprise of the below at our head office with refreshments provided and each trainee will receive a certificate for attending the 'Green Team Recycling Programme'.

- 1) Why Recycle
- 2) Benefits of Recycling
- 3) How to Recycle
- 4) Impact on Companies Recycling (Zero to Landfill, Cost Savings)
- 5) Recycling Test
- 6) Site Processing Tour

## Recycling Facts:

Did you know? 

## Segregating Waste

From **January 1st, 2015**, the UK waste regulations required businesses to **fully segregate their waste into general and recyclables**. This includes the below materials.

- **Paper/Cardboard**
- **Plastic**
- **Metal**
- **Glass**
- **Food**

### Why?

- **To reduce the amount of general waste going into landfill**
- **To increase recycling revenue**
- **To comply with government legislation**
- **To achieve zero to landfill**

## PLASTICS

Enough plastic bottles are thrown away each year to circle the earth four times.

Recycling one tonne of plastic:

- Saves 5,774 kWh energy
- Saves 16.3 barrels (685 gallons) of oil
- Saves 98 million Btu's of energy
- Saves 30 cubic yards of landfill space

Most plastic shopping bags are used only once and a plastic bag can take more than 100 years to decompose!

## PAPER

Recycled paper produces **73% less air pollution** than if it was made from raw materials.

Each tonne of recycled paper will save:

- 17 Trees
- 380 Gallons of oil
- 3 cubic meters of landfill space
- 4000 KW of energy
- 7000 Gallons of water

If every person in the UK recycled just 10% more paper it would save approximately 5 million trees each year.
