SUMMER RECYCLING!

Disposable 'single-use' BBQ's cannot be recycled meaning for each one sold in the UK each year, (estimated over a million) this all goes straight to landfill. Disposable BBQ's can also cause wildfires if used incorrectly or in an inappropriate area.

Summer is an ideal time for taking care of your garden and having a good compost pile means you will have a free source of high-quality fertiliser. It's easy to drop in food scraps which will rot down into plant food!

We all enjoy a picnic in the summer sun but please remember to take away your rubbish. Try pack food in reusable containers and take-home glass or plastic bottles to pop them in your recycling bins – these can take hundreds of years to decompose in landfill!

Having a clothing clear-out? Make sure you donate them to a charity shop or a shelter or if they are in good condition why not sell them on sites such as Depop, Vinted or eBay.
