

January Newsletter 2023

Happy New Year

Here at S and J Synergy, we hope everyone had a fantastic New Year and we look forward to working with you in 2023.

Here are some of our 2022 highlights...

Vehicle & Equipment Additions

S & J added multiple new trucks, and new site equipment such as Skip Trucks, Tankers, and Grab Loader and more!

Staff Additions and Promotions

We welcomed Aaliyah, Emily, to our office team, also promoting Savannah and Therasa into new positions within S & J.

Training

Our Yard Recyclers have completed training courses to operate our telehandler, forklift, and steer loader machinery on site

Skip Additions

Due to increase demand, we added more 1100Ltr Bins, Front End Loaders (FEL'S) and 40 Yard skips to our evergrowing catalogue

If you would like any more information on the above services we offer here at **S & J Synergy**, please visit our website, or call us today on 01482 221217...

S & J are happy to help!

Ready for a Greener 2023?

Here at S&J Synergy it is our mission to recycle as much waste as we possibly can.

We look at all our customer's individual needs, providing support with everything from daily waste disposals to site audits.

A way we suggest achieving improvements is through waste segregation, and this can start from the beginning with internal recycling bins.

S & J Synergy can supply your business with internal recycling bins, and what better way to start recycling than right at the source

Confidential Waste

Have you got any Confidential Waste you need to dispose of?

Then S&J Synergy are here to help!

We can collect and shred your Confidential Waste ensuring it is kept entirely private.

It is important that all confidential waste is stored and kept confidential in accordance with GDPR laws. S&J suggest either Confidential Waste Sacks, sealed with a zip tie or Lockable storage units.

With every collection, we provide a Certificate of Destruction for your compliance records.

Weee Waste

So far in 2023, almost 1,295,000 metric tons of household waste electrical and electronic equipment (WEEE) has been collected worldwide. Items such as kitchen appliances, mobile phones, computers, TV's.

Once waste electrical and electronic equipment is collected it is then taken to a reprocessing plant where they are shredded into small pieces. Once shredded, strong magnets remove ferrous metals, such as steel and other non-metallic metals are removed by using electronic currents. Plastic is sorted into types by using various methods such as, near infrared light and density separation.

Here at S & J Synergy we can help with your Hazardous Waste Streams, including electrical waste (WEEE Waste).

Facilities Management

S & J Synergy offer facility management cleaning services to all our new and existing clients. We can provide high quality cleaning services for your business and maintain cleanliness of workspaces no matter how large or small. We can offer this as a one off deep clean or a long-term contract.

To provide you the very best service, reliability is just as important as high standards of cleanliness. By delivering both, you can be rest assured that the management of your cleaning will be in safe hands with S & J Synergy.

If you would like any more information on the above services we offer here at S & J Synergy, please visit our website, or call us today on 01482 221217...
